Dataman Vali-Flash 4

Dataman Vali-Flash is a PC based validator designed for calculating the CRC-32 and SHA-1 signatures for CompactFlash® memory devices. Vali-Flash offers many exciting and advanced features as shown below.

Features:

- Support for complete range of CompactFlash® devices both Type I and Type II with the supplied card reader
- Signature compatibility with all Dataman Validator products
- Full database features including search and edit of all records
- Encrypted database and visual CRC32 checksum to thwart tampering
- Protected Program File (.exe) to prevent tampering
- Supports Microsoft Windows® 2000 and XP
- Full logging to aid in auditing
- On the fly support for resizing and padding images to fit larger CompactFlash® cards while burning new images
- Better license management featuring online registration
- Use Vali-Flash without administrative privileges (option during installation)
- New user-friendly design that incorporates context sensitive help and tool-tips
- Fully supported Hi-Speed USB 2.0 CompactFlash® card reader

Package Includes:

- Hi-Speed USB 2.0 SanDisk ImageMate® CompactFlash® card reader (P/N: SDDR-91) for use with a desktop or laptop.
- CD-ROM containing the Vali-Flash 4 software
- Software License Agreement
- User's Manual

- Use Vali-Flash without administrative privileges (option during installation)
- On the fly support for resizing and padding images to fit larger CompactFlash® cards while burning new images
- Improved license management featuring online registration
- Full logging to aid in auditing.
- Full database features including searching and editing of all records. Database can also be set to read-only during install to prevent any changes.
- Encrypted database and visual CRC32 checksum to thwart tampering

DATAMAN
